

Welcome to AP Statistics!!

This course is extremely useful in your educational future as well as everyday life. It is more than just a mathematics course. It requires you to read, interpret and analyze pertinent, worldly information and draw conclusions based on your findings.

I will reiterate - **YOU MUST READ, WRITE, and ANALYZE** beyond the mathematical aspect... I hope you're ready for it!!

Please read the introduction and the first section of Chapter 1. Complete all Exercises at the end of both that are numbered in **RED**.

Please keep your work organized and legible! It will be expected by our first meeting (hopefully in person) in September. Enjoy the summer - **BE SAFE!!!**
