Dear Students and Guardian(s),

According to research, students lose about 2.6 months of learning in mathematics over the summer. This phenomenon, also known as summer slide, can cause students to start the new academic year with a lower achievement level than where they left off at the closure of the prior year. Most importantly, researchers identify long-lasting effects from summer loss related to lower self-confidence, as well as success in school and college.

The Shelton Public School System has developed a Summer Math Challenge that can easily integrate into your summer plans. The program is designed to be developmentally appropriate for your student based on the grade level they will be entering for the 2019-2020 school year. We recommend scheduling time for your learner(s) to participate in this program.

The importance of spending time with family and enjoying the outdoors also provides valuable learning opportunities. Involvement in authentic experiences allow learners for knowledge transfer beyond the classroom and vice versa. Many daily scenarios provide opportunities for problem solving and reasoning, such as estimating time and cost of travel, doubling ingredients in family recipes, planning and budgeting for home projects, probability in sports and playing board games.

Specific Grade Summer Math Challenge for students in grades K-12, can be found at www.sHELTONpublicschools.org under the Teaching and Learning tab.

We hope that you will participate in this year’s summer math challenge and help our learners in maintaining and improving their math skills, as well as further develop their confidence in math during the summer.

Gavriela Ziu-Pires
Interim Supervisor of Teaching and Learning-STEM
Shelton Intermediate School
Summer Review Packet
For all students entering
7th Grade Mathematics

Name: ____________________________________________________

Dates worked on: __________________________________________
**Summer Work Directions:**

**Required-**

1) All students are required to complete each of the following exercises in the *summer work packet* using the skills you learned in previous classes. To receive full credit for this assignment, you must show your work and complete ALL of the problems in this packet. You may use a calculator to help with calculations, but you must still show all of your work. For assistance in completing individual problems, you should refer to your notes from previous classes, use online resources such as Khan Academy or work with your peers. I don’t know or IDK will not be accepted.

2) All students are required to complete **at least 10 IXL strands** from the recommended list. All IXL strands can be found under *Grade 6*.

The completed packet and IXL log is due the second day of class. Each part will count as a grade in math class.

**Incentives -**

Students have the opportunity to earn tickets to win a TI-84 Plus Graphing Calculator or gift cards to stores/restaurants in the area by completing **more than** 10 IXL strands from the packet. For each additional 20 minutes spent, you will receive one raffle ticket. The more you practice the greater your chances are of winning!
**Recommended IXL List** - Complete at least 10 IXL strands from the recommended list. All IXL strands can be found under **Grade 6**.

Ratios and Proportional Relationships

**Writing Ratios (Recommended IXL Strands: R.1 and R.2)**

1. Use the table to write the ratio. Explain what the ratio means.

<table>
<thead>
<tr>
<th>Marble</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blue</td>
<td>8</td>
</tr>
<tr>
<td>Red</td>
<td>4</td>
</tr>
<tr>
<td>Purple</td>
<td>6</td>
</tr>
</tbody>
</table>

a) Red to Purple  
b) Blue to Red

c) Purple : All Marbles  
d) All Marbles: Blue

**Unit Rate (Recommended IXL Strands: R.8 and R.11)**

Calculate the unit rate of each situation below.

2. 9 strikes in 3 innings  
3. 117 points in 13 minutes

4. One of the valves on the Hoover Dam releases 40,000 gallons of water per second. What is the rate in gallons per minute?

Decide whether the rates are equivalent:

5. 30 beats per 20 seconds and 90 beats per 60 seconds

6. 10 pages in 15 minutes and 15 pages in 20 minutes

**Percent Problems (Recommended IXL Strands: S.2, S.7 and S.9)**

7. Use the 10 x 10 grid below to model 43%
Re-write the percent as a fraction or mixed number in simplest form.
8. 55% 9. 140%

Write the fraction as a percent.
10. \( \frac{4}{5} \) 11. \( \frac{53}{200} \)

Find the percent of the number.
15. Find 150% of 86. 16. What is 7% of 120? 17. What is 3% of 15?

The Number System

Computation with Fractions (Recommended IXL Strands: J.3, J.6, K.10, L.5, L.7 and O.8)
18. \( \frac{3}{5} + \frac{1}{10} \) 19. \( \frac{1}{2} \div 4 \) 20. \( 3 \times \frac{5}{6} \)

21. \( \frac{5}{8} \times 2\frac{1}{2} \) 22. \( 4 - 2\frac{3}{5} \) 23. \( 4\frac{1}{6} \div 2\frac{1}{4} \)

Computation with Decimals (Recommended IXL Strands: G.1, H.2, H.4 and O.4)
24. 1.5 - 1.06 25. 2.41 + 6 26. 6.3 \times 5

27. 4.38 + 12 28. 3.8 \div 0.16

29. How much change should you get back if you bought hot dogs for $2.52, bread for $1.99 and a case of water for $3.85 and paid with a $20.00 bill? (Don't include tax)
Expressions and Equations

Writing Numerical Expressions (Recommended IXL Strands: Y.1)
30. 14 more than a number x  
31. 25 less than a number b
32. A number x divided by 4.  
33. The product of 3 and 12

Write the phrase as an expression. Then evaluate when x = 5 and y = 20.
34. 3 less than the quotient of a number y and 4  
35. 6 more than the product of 8 and a number x

Expressions with Variables (Recommended IXL Strands: Y.3 and Y.4)
Evaluate the expression when a = 10, b = 9 and c = 4.
36. 2a + 3  
37. 3a + 2b - 6c  
38. \( \frac{a}{2} + 1 \)

Distributive Property (Recommended IXL Strands: Y.11)
39. 3(x + 4)  
40. 7(8 + x + 2)  
41. 5 + 8(3 + x)

Equivalent Expressions (Recommended IXL Strands: Y.14 and Y.15)
Simplify each expression.
42. 4x + 7 + 3x  
43. 10x + 2y - 5x  
44. -6x + x + 8y

One - Step Equations or Inequalities (Recommended IXL Strands: Z.6, Z.7 and AA.4)
45. x - 6 ≥ 4  
46. 12 < 5 + x
47. \( \frac{x}{2} \leq 2 \)  
48. 4x > 8
Geometry

Area (Recommended IXL Strands: FF.3, FF.4 and FF.5)

Find the area of the given shape below.

49.

50.

51.

52.

Perimeter (Recommended IXL Strands: FF.1)

53.

54.

55. You have 450 feet of fencing. Do you have enough to fence the pasture?
Volume \( \text{(Recommended IXL Strands: FF.14)} \)
Find the volume of each rectangular prism.

56. \( \text{5 in.} \times \text{6 in.} \times \text{7 in.} \)

57. \( \text{3} \frac{3}{4} \text{ in.} \times \text{1 in.} \times \text{1} \frac{1}{2} \text{ in.} \)

Statistics and Probability

Find the Mean, Median, Mode and Range of each data set. \( \text{(Recommended IXL Strands: HH.1, HH.3, and HH.4)} \)

58. 20, 17, 42, 26, 27, 12, 31

59. 15, 10, 12, 10, 13, 13, 13, 10, 3
