ENERGY CONSERVATION

The Mount Pleasant Central School District Board of Education embraces energy conservation and believes it to be our responsibility to ensure that every reasonable effort is made to conserve energy and natural resources while exercising sound financial management.

We recognize the importance of adopting an energy conservation policy to govern this program. We also affirm the implementation of this policy will be the joint responsibility of the Board, administration, faculty, staff students, support personnel, and Energy Education. Success is based on cooperation amid all groups.

To ensure the overall success of our behavior-based energy conservation program, the following areas will be emphasized:

1. Designated Building Administrators will be accountable for energy conservation in his/her building, with Energy Education Specialist teams conducting energy audits and providing timely feedback.
2. All personnel at each campus are expected to make a positive contribution to maximize energy conservation and produce real energy savings.
3. Energy Education will implement its energy conservation program primarily through an energy management team led by the Energy Education Specialist(s) in accordance with “Energy Guidelines” that will be adopted by administration and will define the “rules of engagement” for our energy program.
4. Accurate records of energy consumption and cost will be maintained by the Energy Education Specialist for each campus to provide verifiable performance results on the goals and progress of the energy conservation program.

Further, to promote a safe, healthy learning environment and to complement the energy conservation program, each campus shall review and adhere to the preventive maintenance and monitoring plan administered by the campus physical plan for its facilities and systems, including HVAC, building envelope, and moisture management.

Whereas the Board is responsible for overseeing the operations and fiscal accountability of each institution under its governance,

Instruction

SUBJECT: ANIMALS IN THE SCHOOL (INSTRUCTIONAL PURPOSES)

Observation and experimentation with living organisms and animals gives students unique perspectives of life processes. Animals and animal materials should be used respectfully and for the purpose of meeting course objectives.

The Board of Education, in recognizing the educational uses of animals in the classroom, requires that permission be obtained from the Building Principal before animals are brought into the school or classrooms. It is the Principal's responsibility to ensure that there is an appropriate educational purpose if any animal is housed in a classroom. Animals are not to be transported on school buses with the exception of animals certified to assist persons with disabilities.

Study and Care of Live Animals

It shall be the responsibility of the Principal or his/her designee to develop a plan of care for those animals housed in school in the event of an emergency school closing or in the event the animals remain in the classroom on days when school is not in session.

Dissection of Animals

Any student expressing a moral or religious objection to the performance or witnessing of the dissection of an animal, either wholly or in part, shall be provided the opportunity to undertake and complete an alternative project approved by the student's teacher; provided, however, that such objection is substantiated in writing by the student's parent or legal guardian. An alternate activity clearly related to and of comparable rigor will be assigned in lieu of laboratory dissection. Some examples of alternate activities include the use of computer simulations or research. Students who perform alternative projects shall not be penalized.

Effective July 1, 2011, the District will give reasonable notice to all students enrolled in a course that includes the dissection of an animal and students' parent(s)/legal guardian(s) about their rights to seek an alternate project to dissection. Such notice shall be made available upon request at the school and distributed to parents and students enrolled in a course that includes dissection at least once at the beginning of the school year.

Instruction in the Humane Treatment of Animals

Students in elementary school must receive instruction in the humane treatment and protection of animals and the importance of the part they play in the economy of nature as well as the necessity of controlling the proliferation of animals that are subsequently abandoned and caused to suffer extreme cruelty. Such instruction shall be for a period of time as specified by the Board of Regents and may be joined with work in literature, reading, language, nature study, or ethnology.
