

Women's Health and Cancer Rights Act

The Women's Health and Cancer Rights Act of 1998 requires group health plans to make certain benefits available to participants who have undergone a mastectomy. In particular, a plan must offer mastectomy patients benefits for:

- All stages of reconstruction of the breast on which the mastectomy was performed
- Surgery and reconstruction of the other breast to produce a symmetrical appearance
- Protheses
- Treatment of physical complications of the mastectomy, including lymphedema

Our plan complies with these requirements. Benefits for these items generally are comparable to those provided under our plan for similar types of medical services and supplies. Of course, the extent to which any of these items is appropriate following mastectomy is a matter to be determined by the patient and her physician.
