

Sole Source Determination

The Prince George County School System is desirous of procuring an energy management program that does not require any capital improvements or financing, that is funded out of the existing utility budget, that guarantees savings on utility bills that will equal or exceed the costs of the program, and that utilizes personnel employed by the school system and trained by the vendor to run the program. It is the School Board's determination that *Cenergistic, Inc.*, is the only source practicably available to provide the energy management program meeting the specifications required by the school system. Consequently, on February 11, 2013, the School Board awarded a contract to *Cenergistic, Inc.*, in the amount of \$14,300 per month / 48 months for an energy management program meeting the school system specifications.
