The School Board held its regular meeting on March 13, 2017 at 6:30 P.M.

**Presentations**

- **Andrew Derer**, Math Science Innovation Center Coordinator for Special Programs, spoke on MSiC's 50 year celebration on April 29, 2017 from 6:30—9:30. He also spoke on the history of MSiC and the services, programs, and activities offered. He invited all to attend the 50th celebration where the unveiling of Science on a Sphere will occur.

- **Cheryl Simmers** presented a PowerPoint presentation that showed the electricity and carpentry students working as they renovated the 40-year old board room at Rowanty. She is proud of Rowanty's current and former students who had a hand in the renovation. Using students in-house and the partnership with local vendors saved the school money. To promote and expand the needs for career and technical education, Ms. Simmers will attend upcoming events at Moore Middle, Clements Junior, and Prince George High School events and Rowanty students will participate in Walton School's Math/Science Day. Rowanty's job fair is April 6. The culture at Rowanty has grown to be a supportive, interdisciplinary environment that provides education and work-based learning that will give students an opportunity to build a resume and career in their fields of study. She thanked her staff for sharing the vision to help students accomplish their goals and make them successful.

- **Ron Rhodes** reported 197 work orders had been completed over the month. His department is assisting **John Brockwell** with the computer initiative program. He commented on the buses and vehicles that have GPS units. Not all vehicles are GPS equipped and he requested additional equipment to complete the fleet if funding is available. Spring sports are getting ready to start and all scoreboards are operational at this time. He also updated the Board on the water sewer problem/resolution at North and operational cameras at Clements Schools.

**Public Comments**

- **Francoise Bonnell** made comments on the MYP/IB program. She asked the Board to re-evaluate and review true assessments before throwing the program out. She also commented on a Richmond Times Dispatch article and comments made by a Board member.

- **Sheila Minor** indicated the need for a speedy decision on the MYP/IB program to prevent the 5th graders from getting lost in the gap if a decision is not made quickly. She also spoke on the Appomattox Regional Governor's School student slots. She understands the transfer policy but requests the Board to consider funding one or two more student slots to attend ARGS.

- **Sharon Jadrnak** asked the Board to look at the pros and cons of the program, re-evaluate and reverse their decision from December. She asked the audience for a show of hands of those who were in support of the MYP/IB program, in which approximately 20 people raised their hands.

- **Carla Winters** also spoke on the support of the MYP/IB program, stating the program is a benefit to children to improve writing skills, math skills and expands overall outlook. The students in the IB Program have supported the Czech Festival committee by being greeters, and their participation affords the students a learning opportunity to be in this type of environment and provide community service.

**School Board Comment**

- **Kevin Foster** announced the county Core Committee meeting on March 15 at North Elementary to discuss and plan new and renovations of school facilities. He commented on the smooth transition of **Clarence Thweatt**, Interim Transportation Coordinator, working well with staff. Mr. Foster and Mr. Stevenson attended a joint chair/vice chair meeting with their county counterparts and they discussed the school division's financial needs and the Memorandum of Understanding (MOU).
