

STUDENT ATTENDANCE AREAS

The Board of Education will determine school attendance areas. A student who moves into another attendance area within the district during the school year may be allowed to complete that school year at his/her original school provided that the parents/guardians supply the necessary transportation and that space is available within the program at the original school.

Also, a student who moves into another attendance area within the district and has completed the fourth grade may be allowed to complete his/her fifth grade education at the original school provided that space is available and that the parents/guardians supply the necessary transportation.

Adoption date: June 12, 2001
