

Superintendent's Report

Island Park UFSD

Board of Ed Meeting

March 19, 2018

LOMS Perimeter Fence

Q. Why?

A. Safety and Security

- ✓ Animals
- ✓ Vehicles
- ✓ Trespassers

What has been done outdoors to protect children?

- Visitor policy requires appointments
- Signage forbids loitering, trespassing, and provides direction
- Surveillance cameras on doors and buildings monitor outside activity
- Nighthawk systems monitor and discourage outside after-school activity
- ID parking tags on rearview mirrors identify all employee vehicles
- School monitors oversee activity from strategic locations with walkie talkies
- Fencing around playgrounds discourage visitors and limit access
- Additional exterior lighting to deter as well as detect unwanted activity
- Master key and electronic swipe systems control # of keys, duplicates
- Practices restrict access to bus-loading zones

| What else should we do?

- **Gap Analysis**: Identification of “to do” items remaining on industry standard list of security measures to be taken.
- **Risk Analysis**: A comparison of remaining vulnerabilities against the odds that threats from them will materialize.

Gap Analysis

HOMELAND SECURITY K-12 SCHOOL
SECURITY CHECKLIST (April 2013)

BUILDING EXTERIOR 2.21

- Recommends installation of appropriate perimeter barriers (fences) and gates

US HOUSE & SENATE BILLS FOR
SCHOOLS (230, 239)

- Earmark funds for security measures that include locks, fences, and gates

F E N C E

Risk Analysis

- ✓ Animals on fields
- ✓ Vehicles on fields
- ✓ Trespassers on fields
- Intruders/Active Shooters

These incidents have occurred many times and interfered with recess, PE, and sports

Note: *Trespassing consequences cannot legally be enforced unless intruders cross a barrier that delineates property line*

HOMELAND SECURITY TRAININGS: Create obstacles/hurdles that slow down access to building

Stoneman Douglas HS:	<5 mins; 17 dead + 24 injured
Sandy Hook ES:	<5 mins; 27 dead + 2 injured
Lake Sr HS, Minnesota	<9 mins; 10 dead + 7 injured
Marysville Pilchuck HS	3 mins; 5 dead + 3 injured
Marshall County HS	<9 mins; 2 dead + 18 injured

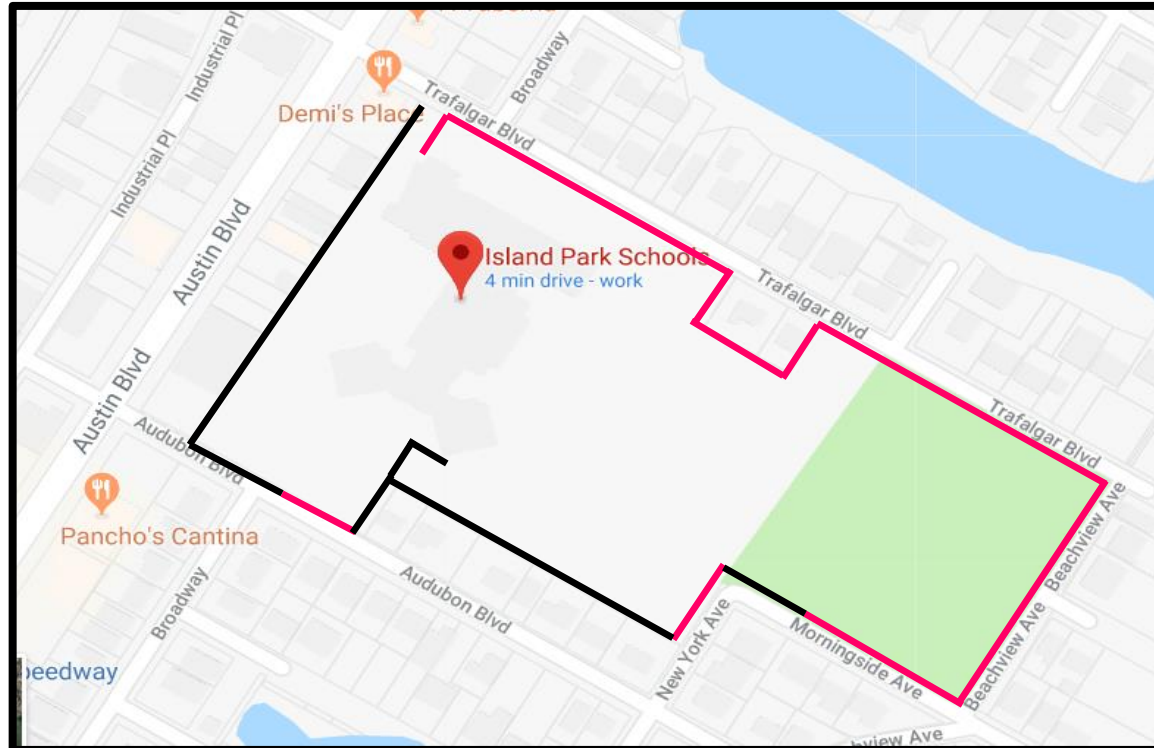

| Why?

Fencing supports security-enhancing principles:

- Designates the school grounds as a well-defined, carefully maintained space that deserves respect from trespassers
- Restricts entry and exit points to a few easily monitored areas
- Enables surveillance by school staff and law enforcement so that intruders can be identified BEFORE they reach the school building
- Limits access to areas that are not highly visible

G**

What is proposed?

Black = Fencing in place

Red = Fencing to be installed

We believe a 5' high perimeter black chainlink fence at the remaining perimeter openings

- * strikes a fair balance between security and aesthetics**
- * deters multiple cars from parking on fields**
- * slows access to the building**
- * helps students and employees feel safer while in school and on the fields**

**Introduction of Sgt Charles Sollin and
Officer Alex Anastasiades of the Fourth Precinct**

A 3D rendering of the text 'Q&A' in a bold, sans-serif font. The 'Q' and 'A' are red, while the ampersand '&' is grey. The letters are set against a white background and cast a soft shadow on the surface below them.
