NEW! Oil Painting for Young Adults (ages 10 and up)

This class will teach principles of traditional oil painting while giving each student individual instruction so they can achieve confidence as they learn and explore the world of classical painting. Emphasis will be on painting directly from life as students will learn to "see" the beauty of the prismatic flow of light. Topics covered: Materials: Setting up an "organized" palette and care of tools. Composition: Simplify into basic shapes, mapping out, horizon lines, focal point. Emphasizing Atmosphere: Attention to prismatic effect as light flows over form. Block in: Value, contrast, massing in light, shapes and modeling forms. Simplification: Keeping things simple, emphasize seeing basic shapes, correcting values. Color mixing: Color harmonies and awareness of warm and cool tones. Edges: Attention to and creating descriptive edges, hard vs soft. A materials list will be sent upon registration.

NEW! Photography for Animation (ages 12-17)

Photographs have long had a place in the world of animation, from reference to cutouts to the creation of stop motion. This class will instruct attendees in the creation of several short vignettes to teach them various techniques for their animation toolbox. The second half of the course will allow the opportunity for students to break into small groups and create their own 30 second animated film. Films will be shown during our final class and students will have the opportunity to discuss their creative process with the class. The first half of the course will be devoted to lecture & lab lessons that will teach various photographic techniques. The lecture section will explain and show video examples of the technique we are working on. Then we will move on to our lab where students will create vignettes to gain hands-on experience in the technique.
