Section 2-d and FERPA assure the confidentiality of records with respect to "third parties," and provides parents with the right to consent to disclosures of personally identifiable information contained in their child's education records. Exceptions to this include school employees, officials and certain State and Federal officials who have a legitimate educational need to access such records. In additions, the Southern Westchester BOCES will, upon request of parents, legal guardians or eligible students, or if otherwise required by law, disclose student records to officials of another school district in which a student seeks to enroll. An eligible student is a student who has reached 18 years of age or attends a postsecondary institution.
- (2) A student's personally identifiable information cannot be sold or released for any commercial purposes;
- (3) Personally, identifiable information includes, but is not limited to:
 - i. The student's name;
 - ii. The name of the student's parent or other family members;
 - iii. The address of the student or student's family;
 - iv. A personal identifier, such as the student's social security number, student number, or biometric record;
 - v. Other indirect identifiers, such as the student's date of birth, place of birth, and mother's maiden name;
 - vi. Other information that, alone or in combination, is linked or linkable to a specific student that would allow a reasonable person in the school community, who does not have personal knowledge of the relevant circumstances, to identify the student with reasonable certainty; or
 - vii. Information requested by a person who the Southern Westchester BOCES reasonably believes knows the identity of the student to whom the education record relates.

- (4) In accordance with FERPA, Section 2-d and Southern Westchester BOCES Policy No. 6320, Student Records: Access and Challenge, parents and legal guardians have the right to inspect and review the complete contents of their child's education record.
- (5) Southern Westchester BOCES has the following safeguards in place: Encryption, firewalls and password protection, which must be in place when data is stored or transferred.
