Accessing Apps on The Chromebooks

Background: Based on student and teacher input, we have added certain apps to aid in either the educational use of your Chromebook or to assist you in using your Chromebook to be more productive in completing your school work. Please follow the directions below to access various apps. If you have any suggestions for apps that should be added, please email Mr. Tromblee (mtromblee@pelhamschools.org) and he will review the request. A description of the apps can be found on the Technology Support website http://www.pelhamschools.org/group_profile_view.aspx?id=4de2e92f-d277-4946-b64a-6154bda7ece1.

Step 1. Please log into your Chromebook using your eChalk username and password.

Step 2: Click on the app dashboard

Step 3: A menu should pop up listing all the apps you have access to. Please note, at the bottom of the menu you should see lines indicating more pages. Clicking on those lines will allow you to access other apps.
