

UIAS Reports

By the fall you should begin to review the Unique Identifier Audit System Reports (UIAS). These reports are located in L2RPT under the **SIRS-701 UIAS Summary Report**. The intent of these reports is to help Local Education Agencies (LEAs) promote data quality and integrity by running a series of tests on select business rules governing proper use of enrollment and location codes in student records.

These reports can indicate that students reported as a dropout (which will count negatively in LEA's graduation rate) have been enrolled in another location. Under this circumstance a student's exit enrollment record can be changed to reflect the accurate reason. This often happens when a student's exit enrollment record gets corrected after the last data pull for the prior year. These types of updates will have to be completed in Level 0 Historical application when it opens.

There are currently four categories of UIAS use cases:

- **Disappearing Students (DS):** Students expected to be continuously enrolled in a given location (an "empty" exit code value in the prior year enrollment record), but with no re-enrollment in that location in the new school year.
- **False Dropouts (FD):** Students exited as dropouts but who may have subsequently reenrolled (within a given time frame or in a qualifying location) that would then suggest the dropout code be replaced with a more appropriate exit code.
- **False Transfers (FT):** Students who were coded as having transferred to a new location but appear not to have re-enrolled under the requirements for that transfer (or, rarely, were reenrolled in the original location – i.e., did NOT transfer – but with no appropriate change in exit code).
- **Simultaneous Enrollments (SE):** Students who appear to be inappropriately enrolled in multiple locations.

Consult the report documentation (link is found in bottom right corner of report) for further clarification
