“Learning something new means questioning those things we do well automatically. It means questioning our tacit expertise….it is the willingness to risk clumsy movements that allows us to become explicit and intentional about what we do. And that, as far as I can tell, is how we can best honor the mystery of learning in our teaching.” – Wagner
Recognizing Strengths

- All grade levels make reading and writing a true priority in their classrooms
- The current curriculum addresses many of the State Standards
- There is an eagerness, openness and commitment to the work
How instructional changes can bring joy and reenergize our practice

- Curriculum articulation and development allows for ongoing collaborative dialogue among teachers and colleagues
- Helps create a culture that values continuous reflection and refinement
- Developing skill based units allows us to teach skills/strategies that are portable and can be applied widely
Meet individually with grade level teams to discuss what the current curriculum is. What areas do we want to preserve?

Align the current curriculum to the State Standards & look more closely at current research surrounding best practices.

Analyze to uncover any gaps, redundancies, or overemphasis on particular standards to identify which areas we want to further develop or revise.

Work collaboratively to design a skill-based curriculum that we all can implement with joy and commitment.

Ongoing supportive professional learning to ensure successful implementation of the newly developed curriculum.

Why A Skill-Based Curriculum?

- It is naturally adaptable and flexible
- Provides consistency & builds grade level to grade level
- Skills are portable and transferable
- Provides freedom and choice to teachers
- More easily aligned to standards
Next Steps

● Begin to build a framework to include curriculum development in Reading

● Plan a Summer Institute to collaborate with teachers in the development of the Reading & Writing curriculum

● Continue to have ongoing supportive professional learning opportunities for teachers to create and collaborate
