School/Community: Carmel High School is accredited by the University of the State of New York. The comprehensive high school includes grades 9 through 12 with an enrollment of 1440 students and over 126 staff members. The Carmel community is a blend of rural and suburban areas located 55 miles north of New York City in Putnam County.

Grading information: Beginning with the class of 2018 we no longer rank our students. Grades range from 0-100; 65 is passing. All subjects except Health, Physical Education and Music Lessons are included in the calculation of the Grade Point Average (GPA). GPA's are computed at the end of the junior year (6th semester), and include high school courses taken in eighth grade. Summer school grades are reported on the transcript and included in the GPA. Grades for courses that are repeated are also shown on the transcript and included in the GPA. If a State Regents exam is retaken, only the highest score is reported. Failing grades are entered on the transcript and included in the GPA, even when the course is repeated. AP and College classes are weighted at 1.15, Honors classes are weighted at 1.10, and Regents classes are weighted at 1.00.

New York State Graduation Requirements for the Class of 2018

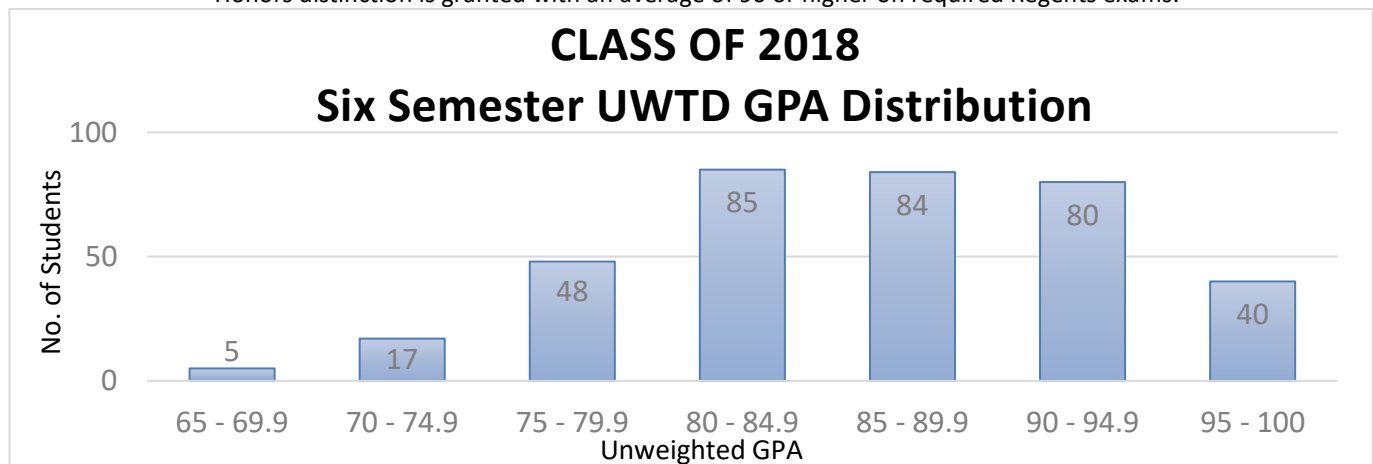

***Regents Diploma**

Special Programs of Study:

New Visions programs are academically rigorous one year programs for college-bound seniors. These programs allow students to earn honors, AP and college credit while working with industry professionals. Many of the New Visions programs are located at sites where students can watch and learn from field practitioners in their work environment. Students participating in New Visions programs must have a strong academic record and commitment to the selected career area.

Science Research in the High School Program is a unique opportunity for students to experience the rigor and rewards of real scientific research while still in high school. The three year sequence of courses is designed to provide students with an understanding of research methods in the sciences and is above and beyond the students' lab science requirements. Summer work activity is also required. Students choose a topic of interest and construct an original experiment, assisted by a mentor of their choice who can be a working scientist from the private or public sector, or college or university professor. In addition to three high school credits, college credits may also be earned through the State University of Albany.

Project Lead the Way provides Carmel High School students with the opportunity to develop engineering and technology skills through an engaging curriculum and problem based learning in a collaborative workspace. College credits for these courses is granted through Rochester Institute of Technology.

Advanced Placement Courses: English Language & Composition; English Literature & Composition; World History; American History; US Government & Politics; Human Geography; Psychology; Biology; Chemistry; Physics I & II; Calculus AB & BC; Music Theory; Studio Art Drawing.
