- We offer Regents, Honor, College level and AP Level courses. When deciding on the level of courses, try to plan a realistic and balanced schedule. Plan a course of study that will challenge you while creating a competitive transcript for college. Think about balancing the amount of homework and the time you need to dedicate to your extracurricular activities. Although it is important to challenge yourself, you need to perform well.
- Consult with parents, teachers, counselors and administrators to create the high school program of study that matches your individual needs.
