

PERSONAL STATEMENT

Please write a Personal Statement discussing your educational and/or career goals. You may want to include some significant aspects of your background, your achievements or your experiences. If you are continuing your studies, you may want to write about your interest in a particular college major. Think of this as a “practice” essay for a college employment application. (Keep a copy.)

Do the best you can, but don't worry, nobody will see this but me. If you are natural and honest, I am sure it will be great!
