

About The EatSMS App

EatSMS is an out-lunch app for all ESMS students. You can select the type of food you are in the mood to eat each day and then see a list of choices near school that match your preference. Students will rate neighborhood restaurants, add comments, provide approximate price range, and give directions. You can view a restaurant's menu and add restaurants to your list of favorites, all with a click of a button.

Please note: for iPhone users, you must click on the "share" button on the bottom center of the page and then click "add to homescreen." For Android users, you will only be able to access the app from the website.

If you are interested in working to further develop this app or if you have any suggestions, please feel free to email us.

Thanks for using **EatSMS!**
