School Nurse

Dear Parents/Guardians,

NY State has revised their regulations for school health practices and immunization requirements for the upcoming school year. Please see the information below and the enclosed forms which are required going forward. Please submit all required documentation prior to September 1, 2018. Updated physicals for grades K, 1, 3, 5 & 7 are required within one month of current physical expiration date.

Thank you for your attention to this important information,
Insert your contact info.

MENINGITIS Vaccine- All incoming 7th graders must have received a single immunization by 9/1/18.

- **NY State STUDENT HEALTH EXAMINATION FORM:** This will be the only acceptable form for physical submission for 2019. Please ask your physician to complete this form in place of their form starting with your child's next physical exam. Physicals are now required for all incoming K, 1st, 3rd, 5th, and 7th graders, as well as for all sport participation.
- An **Asthma Action Plan** and/or **Allergy Action Plan** must be attached to the physical and completed by your child's doctor as applicable. Self carrying of specified inhaler medication and/or epipens must be documented.
- A **Diabetes Management Plan** from your child's Endocrinologist is required for students with diabetes who are required to test blood glucose and utilize insulin via injection or pump. *Please contact my office for a plan if your MD does not have one.*
- The **Medication Form** is required for the School Nurse to be able to administer any medication to your child, including over-the-counter medications. If a medication is not listed on the form, your MD can attach a prescription to the form and the medication can be dropped off in the Nurse's Office on the first day of school in its original labeled pharmacy container. No medication other than inhalers & epipens may be carried by your child in school.
- The **Dental & Eye Forms** are included for your convenience and can be submitted whenever the exam takes place.
