Dear DTS Community,

As many of you are aware, there have been recent cases of schools in New Jersey addressing mold issues.

Please know that Mr. Munsey, our DTS Supervisor of Facilities, has been monitoring and using preventative measures throughout each school year, specifically this summer, to prevent such incidents at DTS. Mr. Munsey has extensive expertise in this area, and he is passionate about maintaining a safe school environment.

Mr. Munsey ensures that ongoing precautionary measures are performed school-wide. Delaware Township regularly inspects for signs of mold and monitors the Building Automated HVAC system. In August 2017 and April 2018 an environmental firm performed tests whose results came back negative.

As always, please feel free to speak to Mr. Munsey or Mrs. Joyce for additional information.

Lastly, please know that the DTS Board and administration will continue to be committed to preventing, testing and addressing any safety issues regarding air and water quality in our school district.

Sincerely,
Dr. R. Wiener
