

For Health Class

Students in grades 6-8 should determine an organized way to keep their health notes, study guides and classwork together. This can include a two-pocket folder, binder, or section of a binder. Grades 6 and 7 will need to cover a textbook.

Every Student in grades K-5 should have a two pocket folder with a pencil in it to take to health class.

This will ensure that students demonstrate class preparedness by having their notes, study guides, and classwork with them and organized.

Their own folder will have one side devoted to returned work so that they are able to determine what completed work may go home to be shared and reviewed.
