

# MATH PARENT GUIDE - UNIT 3

## IMPORTANT CONCEPTS YOUR STUDENT SHOULD KNOW AND ACTIVITIES TO DO AT HOME

### Equivalent Fractions and Comparing Fractions

#### Important Concepts Addressed in this Unit

- |   |   |
|---|---|
| <ul style="list-style-type: none"> <li>● Recognize a fraction.</li> <li>● Model a fraction using fraction bars, fraction towers, pictures, and number lines.</li> <li>● Explain why two fractions are equivalent by using visual fraction models.</li> <li>● Identify equivalent fractions.</li> <li>● Create equivalent fractions.</li> <li>● Solve word problems involving equivalent fractions.</li> </ul> | <ul style="list-style-type: none"> <li>● Compare two or more fractions using fractions, bars, fraction towers, pictures, and number lines.</li> <li>● Compare two or more fractions using <math>&lt;</math>, <math>&gt;</math>, or <math>=</math>.</li> <li>● Solve word problems involving comparing fractions.</li> </ul> |
|---|---|

#### Key Words To Know

***fraction:*** A way to describe a part of a whole or a part of a group by using equal parts.  
***numerator:*** The number written above the line in a fraction. It tells how many equal parts are in the fraction.  
***denominator:*** The number written below the line in a fraction. It tells how many equal parts are in the whole.  
***equivalent fraction:*** Fractions that have the same value.

#### How You Can Help Your Student

**Interactive Learning Games:** Playing games is a wonderful way to practice skills at home in a fun environment.

# MATH PARENT GUIDE - UNIT 3

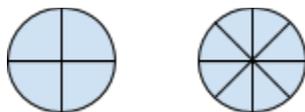

## Sample Problems

- What fraction does the dot represent on the number line?

- Compare the fractions  $\frac{2}{3}$  \_\_\_  $\frac{5}{6}$
- Using the models below, compare the two fractions

- $\frac{2}{3} = \frac{4}{6}$
- Billy ate  $\frac{4}{10}$  of a pizza. Jim's pizza had 5 slices of pizza. He ate the same amount of pizza as Billy. What fraction of the pizza did Jim eat? Answer:  $\frac{2}{5}$
- John and Blake each had the same size pizza. John ate  $\frac{1}{4}$  of his pizza. Blake ate 3 of his 8 slices. Who ate more? Answer: Blake, because  $\frac{3}{8}$  is more than  $\frac{1}{4}$ .
- $\frac{6}{9} = \frac{?}{27}$  ? = 18
