What is CARE?

- Care Team is comprised of teachers, administrators, family support specialists and possible staff members from community agencies.
- As a team, we work together to provide resources that students and families need to excel and gain resiliency.

CARE helps kids SUCCEED by...

- Identifying students' and families' needs such as food and clothing, helping to find doctors and dentists, and connecting them to those resources.
- Working with other agencies to provide information on important topics, such as drug abuse prevention.
- One or more team member will work with your family or student to get their needs met.

How can CARE help my child or family?

- Students and families can be referred by a staff member or they can refer themselves. They can contact a team member listed on the back of this brochure.
- We respect your privacy and follow the law when it comes to keeping your family's information confidential.

CARE Vision

Every student has the support to be successful.

CARE Mission

To implement and sustain the CARE Team model through coordination and alignment of resources.

CARE Guiding Principles

- We know the lives of families and kids are complicated and we want to help families succeed. In order to do that, and address the stress we all live under, we have a CARE Team.
