

Park Avenue Elementary School

Major Goals of the Park Avenue School Plan

Goal #1: To raise levels of student achievement by providing increased opportunities for language and literacy development in all classrooms. To implement this goal we intend to strengthen the ability of children to demonstrate their understanding of written and oral texts beyond the literal level through well-organized and thoughtful writing and the effective use of language mechanics conventions.

Goal #2: To maintain a high level of student achievement in mathematics by providing opportunities for students to practice basic computation, solve multi-step problems, make predictions, identify arrangement and patterns, explain reasoning, draw conclusions and analyze situations mathematically.

Goal #3: In order to ensure a safe school environment and promote the cognitive, ethical and social-emotional growth of students, Park Avenue will continue to expand its efforts to support comprehensive Character Education grades K-5.

Goal #4: To continue to offer greater opportunities for parent and broader community involvement at Park Avenue through the continued implementation of a community school program. Broader community involvement will not only enrich our instructional programs but help Park Avenue families secure the resources they will need to improve the quality of their lives and the readiness of their children to learn and experience success in school.
