Google Sign on

All students have a district Google account. You can access google with any browser or device. Google Chrome works best, but Firefox, Safari and Internet Explorer will work as well. For your best Google experience you can download and install Google Chrome.

With Google your email address is also your username. A student email is the last two digits of their graduation year + first and last name (as it appears in PowerSchool). EX: 5th grader - John Doe - 24jonathondoe@penntrafford.org

To sign into Google enter google.com into your browser of choice. Click sign-in (top right)
