

Young Scientists

Before School STEAM Club 2017-2018 School Year Level Green Elementary

STEAM Education:

Our program covers skills and content related to Science, Technology, Engineering, Art and Mathematics. Students are engaged in hands-on projects and lessons each month.

Join the Club

Starting October 2017

This will be the second year of Young Scientists. Last year students in grades K-5 had a great time exploring many different skills in STEAM education. Students collaborate to solve real world problems and learn valuable skills for their futures. The lessons are student driven and involve higher-order thinking skills and exploration.

Anyone in grades K-5 can join Young Scientists. There is a different schedule for students in grades K-2 and 3-5. Please tear off the schedule to keep at your house and turn in the permission slip to Mrs. Shogan, Room 12, if you are signing up! :)
