Out of respect for the
privacy of participants,
these discussion groups
will not be recorded.

Welcome back Nest families!

We are thrilled to begin virtual family discussion groups for parents and caregivers of NEST students. We invite you to join us for an hour of discussion during which caregivers offer support and validation to one another. This first discussion group will focus on identifying family needs, planning discussion themes for the upcoming year, and highlighting how we use family strengths to persevere during these times.

Michelle Lee, PhD is a licensed clinical psychologist and Clinical Assistant Professor in the Department of Child and Adolescent Psychiatry at NYU Langone.

Michelle Flemen-Tung is an instructional specialist for the ASD Support Team at NYU. She is also the proud mom of 3 boys who attend NYC public schools and is working to figure out remote learning and basic family survival in real time.

Dorothy Siegel is the co-founder of the ASD Nest program and *Director Emerita* of the ASD Nest Support Project at NYU. Dorothy is a tireless advocate for families of children with ASD and is the proud mother of an autistic son.

This Family Webinar is sponsored by the ASD Nest Support Project at New York University's Steinhardt School of Culture, Education and Human Development. We are grateful to the New York City Department of Education which provides a grant to NYU to provide this workshop.
