ACCEPTABLE USE POLICY FOR TECHNOLOGY AND THE INTERNET

– STUDENTS –

Introduction

Port Chester- Rye Union Free School District (“School District”) furnishes computers and provides access to the Internet in order to support learning and enhance instruction. By providing access to the Internet, a vast information highway connecting thousands of computers all over the world, the School District intends to promote educational excellence and to prepare students for an increasingly technological world. This use should facilitate resource sharing, research, innovation and communication.

However, the School District also recognizes that with this access comes the availability of material which is unrelated to scholarship, and which in many instances is inappropriate for places of learning, and inappropriate for young people in particular. For this reason, some resources such as e-mail and discussion groups are only to be used under directed supervision by faculty, and will be limited to teacher-directed projects. In addition, the School District, in cooperation with the Board of Cooperative Educational Services (BOCES), has taken precautions to restrict access to questionable materials, but students and parents need to know that it is impossible to control all materials.

Much of the responsibility for appropriate use of the Internet must rest on students themselves. Therefore, the School District requires that students act responsibly by reading and following its policies regarding Technology and the Internet. Copies of these policies are available to parents upon request.

Ultimately, we realize that the parents/guardians of minors are responsible for setting and conveying the standards that their students should follow. Likewise, parents and students must understand that the use of technology is a privilege, not a right and that, if procedures or policies are not followed, students will lose this privilege.

Applicability and General Principles

These policies apply to all students who gain access to the Internet via computer equipment and/or access lines located in the School District. This includes any remote access which students may gain from off-site, but which involves the use of School District sites, servers, intranet facilities, e-mail accounts or software.

All access to and use of the Internet must be for the purposes of education and research consistent with the educational goals of the School District. Students must make efficient, ethical and legal utilization of network resources. Students must be aware that material created, stored on, or transmitted from or via the system is not guaranteed to be private.
In addition to the fact that the Internet is inherently insecure, School District network administrators may review the system at any time to ensure that the system is being used properly. For this reason, students should expect that e-mails, materials placed on personal Web pages, and other work that is created on the network may be viewed by a third party.

External access will be provided to authorized users by the assignment of unique log-in identification codes (“usernames” and passwords) and, where appropriate, with limited hard disk space on School District hardware, for their own individual use. Authorized users will be personally responsible for maintaining the integrity of the School District’s access policy, and may not permit other persons to use their usernames, passwords, accounts or disk space, or disclose their usernames, passwords or account information to any third party.

Usernames and passwords will be furnished subject to the provisions of this Policy, and such updates or modifications as may hereafter be promulgated.

Users must respect the integrity and security of the School District’s systems and network, and the access privileges, privacy and reasonable preferences of other users. The School District reserves the right to limit access time and disk space in order to optimize an equitable allocation of resources among users.

The School District makes no warranties of any kind, whether express or implied, for the service it is providing. It is not responsible for any damages, including loss of data resulting from delays, non-deliveries, mis-deliveries, or service interruptions, whether caused by the School District’s negligence, or by a user’s errors or omissions. Information obtained from the Internet is used at the user’s (student’s) own risk, and the School District specifically disclaims any responsibility for the accuracy or quality of information obtained by students via access provided by or through the School District. The following policies are intentionally broad in scope and, therefore, may include references to resources, technology and uses not yet available.

Rules of Conduct and Compliance

Students who violate this Acceptable Use Policy may have their access privileges suspended or revoked by the network administrator. In addition, because the School District’s information networks and systems are used as part of the educational program, the School District’s Code of Conduct also applies to network activities. This Acceptable Use Policy is an extension of the Code of Conduct, and the disciplinary penalties set out in the Code of Conduct will apply if the student acts in violation of this Acceptable Use Policy.

Except as otherwise indicated below, all policies and prohibitions regarding users of the network also apply to users of individual School District computers.
1. The network may not be used to download, copy, or store any software, shareware, or freeware. In order to avoid copyright issues, this prohibition applies to any such downloading, copying or storage, regardless of copyright status, unless approved by a network administrator. Moreover, only the network administrator is authorized to consent to the terms of any software license with respect to downloaded programs.

2. No user may add any software or application to a School District computer or to the network without the prior approval of the appropriate faculty member/administrator (in the case of an individual computer) or the network administrator (in the case of the network).

3. The network may not be used for any commercial purposes, and users may not buy or sell products or services through the system.

4. The network may not be used for advertising, political campaigning, or political lobbying.

5. The network may not be used for any activity, or to transmit any material, that violates United States, New York State or local laws. This includes, but is not limited to, fraudulent acts, violations of copyright laws, and any threat or act of intimidation or harassment against another person.

6. The School District is a place of tolerance and good manners. Use of the network or any School District computer facilities for hate mail, defamatory statements, statements intended to injure or humiliate others by disclosure of personal information (whether true or false), personal attacks on others, and statements expressing animus towards any person or group by reason of race, color, religion, national origin, gender, sexual orientation or disability is prohibited.

7. Network users may not use vulgar, derogatory, or obscene language.

8. Network users may not post anonymous messages or forge e-mail or other messages. Users are strongly advised to use caution about revealing any information on the Internet which would enable others to exploit them or their identities: this includes last names, home addresses, Social Security numbers, passwords, credit card numbers or financial institution account information, and photographs. Under no circumstances should a user reveal such information about another person without that person’s express or prior consent.

9. Network users may not log on to someone else’s account, attempt to access another user’s files, or permit anyone else to log on to their own accounts. Users may not try to gain unauthorized access (“hacking”) to the files or computer systems of any other person or organization. However, students must be aware that any information stored on or communicated through the School District network may be susceptible to “hacking” by a third party.
10. Network users may not access Web sites, newsgroups, or chat areas that contain material that is obscene or that promotes illegal acts. If a user accidentally accesses this type of information, he or she should immediately notify a teacher, librarian, and/or network administrator. Likewise, use of the network to access or process pornographic material (whether visual or written), or material which contains dangerous recipes, formulas or instructions, is prohibited.

11. Users may not access newsgroups, chat rooms, list servers, or other services where they may communicate with people outside of the School District (specifically including e-mail) unless they are supervised by a teacher and have been given explicit approval to do so (e.g.: “keypal” interactions for a particular class).

12. Users may not engage in “spamming” (sending irrelevant or inappropriate electronic communications individually or en masse) or participate in electronic chain letters other than for official school district purposes.

13. Users who maliciously access, alter, delete, damage or destroy any computer system, computer network, computer program, or data will be subject to criminal prosecution as well as to disciplinary action by the School District. This includes, but is not limited to, changing or deleting another user's account; changing the password of another user; using an unauthorized account; damaging any files; altering the system; using the system to make money illegally; destroying, modifying, vandalizing, defacing or abusing hardware, software, furniture or any School District property. Users may not develop programs that harass other users or infiltrate a computer or computer system and/or damage the software components of a computer or computer system (e.g., create viruses, worms) is prohibited.

14. Users may not intentionally disrupt information network traffic or crash the network and connected systems; they must not degrade or disrupt equipment or system performance. They must not download or save excessively large files without the express approval of the network administrator. Users may not add any software or applications to the School District’s network or computers, or add to or modify any existing software or applications, without the express permission of the network administrator.

15. As is the case with all student work, users may not plagiarize, which is a serious academic offense. Plagiarism is "taking ideas or writings from another person and offering them as your own." Credit must always be given to the person who created the article or the idea. A student who, by cutting and pasting text or data, leads readers to believe that what they are reading is the student's original work when it is not, is guilty of plagiarism.

16. Users must comply with the “fair use” provisions of the United States Copyright Act of 1976. "Fair use" in this context means that the copyrighted materials of others may be used only for scholarly purposes, and that the use must be limited
to brief excerpts. The School District’s library professionals can assist students with fair use issues.

17. Users may not copy any copyrighted or licensed software from the Internet or from the network without the express permission of the copyright holder: software must be purchased or licensed before it can legally be used.

18. Users may not take data, equipment, software or supplies (paper, toner cartridges, disks, etc.) for their own personal use. Such taking will be treated as theft. Use of School District printers and paper must be reasonable.

19. Users must behave properly in any computer lab setting. Normal rules of classroom decorum and compliance with instructions from faculty and administrators will apply.

20. Port Chester- Rye Union Free School District assumes no responsibility for student, faculty or staff websites created and hosted outside of the district network.

**Violations and Consequences**

Consequences of violations include but are not limited to:

- Suspension or revocation of information network access;
- Suspension or revocation of network privileges;
- Suspension or revocation of computer access;
- Suspension from school;
- Expulsion from school;
- Criminal prosecution.

In addition, the School District will seek monetary compensation for damages in appropriate cases.

Repeated or severe violations will result in more serious penalties than one-time or minor infractions.

This Acceptable Use Policy is subject to change. The School District reserves the right to restrict or terminate information network access at any time for any reason. The School District further reserves the right to monitor network activity as it sees fit in order to maintain the integrity of the network and to monitor acceptable use. School and District-wide administrators will make final determination as to what constitutes unacceptable use.
Disciplinary penalties involving possible suspension or expulsion from school will be determined in accordance with the School District’s Code of Conduct. However, suspension or revocation of access privileges will be determined by the network administrator, acting in consultation with school and District-wide administrators.
ACCEPTABLE USE POLICY FOR TECHNOLOGY
AND THE INTERNET AGREEMENT

I have read, understand, and agree to the terms and conditions of the
Port Chester Rye Union Free School District ACCEPTABLE USE
POLICY FOR TECHNOLOGY AND THE INTERNET.
