

Remind App – Verizon customers

<https://www.remind.com/resources/verizon-fee>

You may have received a message like this:

Information: Coming January 28, Verizon will be charging a fee *to the Remind company* for text messaging. *The fee is not for the Verizon customer.* This means Remind (the company) will not send texts to Verizon customers.

How it affects PSIS families: We use Remind, the Remind App and its services to keep you informed. If you are a Verizon customer you CAN STILL USE Remind to stay in contact with us. Here's how:

Download the Remind App (if you haven't done so already) and create or use your account to **turn on** App and/or email notifications.

Also, check the link above and consider taking part in Remind's campaign to reverse the Verizon fee.

As a staff, we are looking in to other options we can provide for parent communication. Please stay tuned.
