

Principal's Message

Shuang Wen School is committed to preparing students for global economic competition by helping them achieve second language competency through dual language acquisition learning model. By including both English Language Learners and native English Speakers and having them study and integrate in all subject area classes, the curriculum establishes an integrated environment that helps each student achieve the highest level of language proficiency. Heritage Chinese Speakers and English Language Learners receive instructions in English and Mandarin Chinese in the subject areas to strengthen their knowledge in content areas; Native English speakers learn and practice Mandarin Chinese through actively learning and interaction in the content classes and achieve higher level of competency in all content subject areas, creating win-win academic results for all students.

Our school community is committed in providing educational excellence for every student. Every curriculum in every subject area will not only meet the Common Core Learning Standards but also integrate rigorous content and knowledge. The school culture will promote a sense of belonging where school staff will provide inter-personal care and positive support for every student's individual growth and progress. We are proud of our family like safe and caring learning environment where our children, from Pre-K to 8th grade, can flourish and achieve highest level of academic success in both English and Chinese, ready to contribute to the global market with global competency.
