February 7, 2020

Dear Families,

In September, we sent out a letter describing the dangers of using eCigarettes and the act of vaping. We want to continue to be proactive in teaching students about this important topic. Many teenagers feel that there are no harmful health effects associated with eCigarettes and vaping products. It is important that we make sure that our students understand that this is simply not true.

On Monday February 10, 2020, all students in Grades 6 - 12 will be attending assemblies designed to teach them, at a grade appropriate level, about the dangers of using these products. Thank you to the Westlake Middle School PTA and Westlake High School PTA for joining together to bring these important assemblies to our students.

Below are links to resources to help you better understand why this practice is becoming popular among teenagers, and the dangers that it presents. The resources include tips for talking with your children about the topic. We encourage you to have conversations with your child about what they learned at these assemblies.
