

The Nutrition Group is proud to offer school menus through Nutrislice, the leading provider of K-12 digital menus

The Value of Nutrislice

At The Nutrition Group, we are very passionate about offering students healthy, delicious meals. Today's parents and students expect high quality foods as well as information about those foods at their fingertips. Traditional paper or PDF menus just don't cut it anymore. That's why we have partnered with Nutrislice to bring you the most informative, interactive digital menus available.

Through this partnership, parents and students have the ability to access their school's menu online, on their mobile phone or tablet, or on any *Amazon Alexa* enabled device. Plus, unlike traditional menus, Nutrislice gives the ability to review key information for any meal item, including:

- An image
- A detailed description
- Ingredients
- Carb counts
- Allergens
- Special diet information

Parents and students can also filter menus, making it easier on those with special diet considerations. In addition to this enhanced visibility, users can also rate each menu item and provide feedback so that The Nutrition Group can continue to fine tune and evolve menus.

Access school menus today by using any of these easy, convenient methods:

Mobile App

Download the Nutrislice app:

Alexa

Activate the "School Menus by Nutrislice" skill:

Online

View menus online by checking the school district website
