To Our Valued Customers,

May 18, 2017

Rich's Ice Cream Company has developed systems for the management of allergenic materials minimizing the risk of allergen contamination. Our allergen program is based on best industry practices which include a robust sanitation program and strict adherence to cGMP's (Current Good Manufacturing Practices).

We, at Rich's Ice Cream, want to help protect your family the same way we do ours. We understand the high level of concern of protecting those who have nut allergies. This is why, that in 2016, we made the decision to become a "Nut Free" facility. We do our diligence from top to bottom... from our suppliers who make our ingredients, our vending machines and employee lunches to ensure we are 100% nut free. We have the strictest policies to protect our consumers.

We at Rich's Ice Cream are dedicated to safe quality products and feel confident that our allergen programs represent best industry practices.

Yours for Quality and Safety,

Rich Whittaker  
Director of Quality Assurance & Regulatory Affairs  
Rich's Ice Cream
