MODEL SCHOOLS
2019-2020 CALENDAR

PROFESSIONAL DEVELOPMENT SESSIONS, TRAININGS & EVENTS
Back for the second year, we are proud to present the LHRIC Instructional Technology Professional Development Event Calendar. This year's calendar is fully inclusive of the high-quality professional development opportunities you've come to count on and appreciate. New this year is a selection of online courses, “PD Your Way,” hosted in Schoology and facilitated by Model Schools Coaches.

Here are a few tips to help you get started:

• Event Details – Use MyLearningPlan for a detailed description, logistics, and registration information. All event participants are eligible for CTLE Credits.
• Event Locations – The majority of events are located at the LHRIC’s Harrison Offices at 450 Mamaroneck Avenue in Harrison unless otherwise indicated. Exceptions are PD Your Way, and TLI and occasional PD events.
• Cancellations/Changes – In the event of a change or cancellation, an email will be sent out to those registered through MyLearningPlan with as much advance notice as possible. For weather-related cancellations, check our website or local TV or radio.

Each year our professional development offerings are inspired by your participation and feedback. We are thankful to have you in our professional network and look forward to seeing you again this year.

The Model Schools Team

LHRIC Mission Statement:
“We provide K-12 leadership with our partner districts to achieve their educational technology goals.”

Instructional Technology Mission Statement:
“We foster a community of professionals through the exchange of ideas and leveraging creative and innovative use of technology in a global collaborative environment for the advancement of all learners.”

WELCOME TO LHRIC/IT MODEL SCHOOLS 2019-2020 CALENDAR

Model Schools
• Professional development is provided to teachers and administrators in support of instructional goals in the form of workshops, seminars, webinars, learning communities, and user groups.
• Also available are software user groups and product spotlights designed to ensure school district stakeholders are prepared with the latest details about the software, including new features, tips and tricks, and professional development for both participating and new users.
• New this year is PD Your Way: a collection of quality online workshops facilitated by a LHRIC coach. The courses run approximately four weeks and take 3-5 hours to complete. Upon registration, each participant will receive a “care package” to ensure maximum success and satisfaction!

Membership in the Model Schools Core service is required.
Access to events is open to all district staff without limit.

Technology Leadership Institute (TLI)
TLI is a series of seven conference opportunities: Tech Summit, the NYSCATE Annual Conference, TLI Winter Event, Active=Con, TELL Awards, NYSCATE/COSN CTO Clinic, and Tech Expo. The goal of this series is to bring national keynote speakers as well as innovative ideas and topics to local venues. This year we have aligned the series to a theme of Digital Wellness for the School Community. Membership in TLI Services is required and provides up to eight seats at each event. Look forward to a separate detailed catalog for this series.

NYSCATE
The LHRIC maintains a partnership with this state organization to take advantage of the depth and breadth of programming and connections they offer. NYSCATE’s annual and regional events add even more opportunities for networking and growth for our members. There may be additional fees associated with workshops offered by NYSCATE to cover costs.

How can we help students stay safe and productive as they navigate online environments? The Internet has made learning an “anytime, anywhere” experience. One result – school walls no longer ensure complete digital safety during learning. Still, the good digital habits that schools reinforce with students in the classroom can have benefits far beyond the school day.

Maintaining Digital Wellness

“Digital health and wellness refers to physical and psycho-social well-being in a technological world. Given the ever-increasing frequency with which students use technologies, particularly in their personal lives, health and wellness are areas that need to be addressed in the interest of developing well-balanced future citizens.” (Source: Rocky View School Website)

“Digital health and wellness” is increasing in popularity as a search term, according to Google trends. When we are saturated by multiple devices, increasing access, and complex data influences, how do we help students of all ages maintain a healthy relationship with technology? How do we maintain our own?

Recommended Sessions:

Digital Wellness: Bringing Mindfulness to Instructional Technology...1/13, 2/12, 3/24, 4/14, 5/12, 6/9

**School Testing**
Developing confident and self reliant learners is one of the most important objectives of schools. Increasing access to devices and information has expanded our concept of what it means to be literate, both as a student and as a citizen. Technology, in conjunction with effective practices, is being successfully utilized to aid literacy development in all classrooms, from basic reading instruction to global and digital citizenship.

The Empowered Student

With consistent guidance and instruction, students of all ages can learn to choose technology as a learning tool in ways that allow them to embrace greater ownership of their academic progress. The right combination of cutting edge tools and instructional strategies can better empower students to express their voices in service to personalized learning.

What does it look like to foster in-depth conversations and connections beyond hitting “like” or “follow”…? We can leverage technology to go beyond traditional formats for classroom exchanges, to discussions that promote higher-order thinking, effective communication, and social-emotional learning. We can traverse traditional barriers by using virtual communication platforms that build empathy and create knowledge.

Deep Learning

Research in neuroscience is shedding new light on how students learn and develop. Sometimes, technology can provide an initial spark of insight and inspiration that leads to deeper cognition and mastery of content.

There are many conditions that schools can influence to support student learning, including the intentional selection and use of technology tools and platforms, and the physical environments in which learning occurs.

“PD Your Way” Spotlight: Your Time, Your Place, Your Pace

“PD Your Way” Online Workshops are fully facilitated by a LHRIC coach and are eligible for CTLE credits. The courses run approximately 4 weeks and take 3-5 hours to complete. Participants receive a “care package” upon registration to ensure maximum success and satisfaction, and have the option of applying for additional microcredentials to demonstrate evidence of practice. New to online learning? We schedule face to face orientation sessions during the year to give you the confidence, skills and tools to make the most of your experience. Overcome time and geography constraints by joining your fellow educators in these online sessions.

Recommended Sessions:
