

Summer Math and Reading for Fourth Grade

Math

At the beginning of the school year, students will be expected to do 100 basic multiplication facts in under 7 minutes. Division will be added when the majority of the students have mastered multiplication. As the school year progresses, the times will be reduced. Students should all be at this starting point on the first day of school. Timed tests will be given the first week back. Addition and subtraction should already be mastered and will be tested regularly.

During the summer, practice the attached Math Facts once a week. Write the time it took you on the bottom of the page. Try to beat your time each week. Please bring these sheets with you on the first day of school. Practice, practice, practice! For additional practice to mastery, there are a number of apps and online games students can use in addition to the required math practice page attached.

Reading

- 1.** In the fourth grade, we will practice reading in the following genres: fiction, mystery, historical fiction, and non-fiction. Students should read a book on their individual reading levels in two of the 4 of genres listed (student choice of which four.) Students should be prepared to pass AR tests over these books.
- 2.** Students should also read *The Tale of Despereaux* by Kate DiCamillo late in the summer. All students will participate in activities and quizzes based on this book during the first weeks of school.
- 3.** Students need to bring a list of the books they read this summer with them on the first day. See page 2 and fill out.

Name: _____

Please bring this with you on the first day of school. AR test will be taken over the books you've listed.

BOOK TITLE	GENRE	YOUR RATING(1-10)
1. _____	_____	_____
2. _____	_____	_____
3. <u>The Tale of Despereaux</u>	<u>fantasy</u>	_____
