Issue No. 38

Orden

Orderliness

Ser **ordenado** es ser nítido y vivir en armonía. Significa estar organizado y tener un lugar fijo para guardar las cosas que usamos. Cuando somos **ordenados** hacemos un plan para hacer algo, en el cual, procedemos paso a paso, no a lo loco. Ser **ordenado** significa poner lo más urgente de primero y tener control sobre los deberes pendientes.

Paso este día con orden.

Hago todo paso a paso.

Mantengo la belleza y la armonía en mi lugar y en mi vida.

Orderliness is being neat, and living with a sense of harmony. It is being organized and having a place for our things. We use **orderliness** when we work on projects. We make a plan, then carry it out step by step.

When we practice **orderliness** we decide how we want to arrange the space around us to keep it clean, organized and attractive. After we use our things, we put them away where they belong. **Orderliness** helps us solve difficult problems. We just divide them into small parts and handle each part one at a time.

Order around us creates **order** inside us. It gives us a clear mind.

Ada Lovelace showed a gift for mathematics at an early age. She is widely known for her work on Charles Babbage's Analytical Engine, an early general-purpose computer. Her writings include what is viewed as the first algorithm to be processed by a machine, earning her the reputation of being "the world's first computer programmer." Ada also predicted the broad capabilities of computer, such as creating graphics and music. The modern computer programming language Ada is named in her honor.

ULTIMO DÍA DE CLASES

jueves el 21 de mayo
