

MISSION STATEMENT

The mission of P23 Q is to move students back to a less restrictive environment while providing the child with academic rigor, social emotional learning where students learn to optimize their emotional intelligence along with exposure to the arts, technology and music. To this end, we have formed collaborative partnerships with various agencies that offer performances, hands on theater, art, technology, and music workshops which provide opportunities for socialization.

TECHNOLOGY MISSION STATEMENT

It is the mission of P23 Queens to provide opportunities for students to gather information using text, sound, pictures and video to enhance learning experiences while enriching core curriculum areas using our state-of-the-art computer labs, while aligning with the Common Core Standards (CCS).

KEY AREA OF FOCUS FOR THE SCHOOL YEAR

- Increase Social Emotional Learning throughout all sites.
- Advanced Literacies
- Continue to enhance our high school program: Academically, CDOS and Vocational Training to provide opportunities with students with psychiatric challenges to graduate from high school.
- Increase strong Family-Community Ties.

PRIORITY AREA

Knowing every student well. A very important goal at the beginning of the school year is to get to know our students. The better we know our students, the better we can create learning experiences that align to who they are. Knowing our students is key to differentiating instruction. Through assessments and looking at data, we will create learner profiles that are meaningful for all stakeholders to help them learn. The data must drive instructional outcomes for each student. We must consider what sort of information we need to know about the students as individuals.
