

Grade 6 Summer MATH Assignment

Hello Future 6th Graders!

As 5th Graders, you had a busy year learning new math skills. Mastery of all of these skills is extremely important to develop a solid math foundation. The 6th grade program will add onto these 5th grade skills, so any time spent learning and reviewing your 5th grade skills will greatly help you as you start the year off in September!

After you have completed the math problems, and you feel that you are still struggling with certain topics or concepts, visit the WEBSITES listed on the next page. These sites provide games, extra help, and extra practice for Math topics for Grade 5, along with any extra practice you may need from Grade 4, and any challenges you may want to face from Grade 6!

IMPORTANT:

- This will count as your first week's worth of **homework grades**.
- This packet will be due on the **FIRST DAY OF SCHOOL**.
- ALL WORK must be shown to **get full credit!**

See you in September!

Sincerely,

The 6th Grade Teachers
