June 2020

Dear Parents of incoming 9 & 10 students:

To help our students retain the math skills they acquired this past school year, the THS Math Department has developed a math enrichment assignment on the Castle Learning website for students to utilize while away from the classroom this summer. **All assignments will be made available on July 6th.** Although, this is not mandatory, we strongly recommend students review previously learned topics. **Students should select the class that they are entering in September** to practice their math skills for their summer review.

- Algebra 1 R
- Algebra 1A R
- Algebra 1B R
- Geometry Regents
- Applications of Geometry
- Algebra 2 R

Many students are familiar with Castle Learning and the information below will assist any student in logging on to the site. Hard copies are also available (see information below).

- Please go to URL: www.castlelearning.com
- Log on with username: luck.lastnamefirstinitial
- Password: (All passwords have been cleared. Students will be prompted to create their own new password)
- Any issues with logging in, please call the Castle Learning support phone number (1-800-345-7606) or email support@castlelearning.com

A hard copy of each assignment will be available in the high school main office or guidance office for those that do not have computer access over the summer.

Students should remember:

***Choose the assignment for the class that they will be entering in September 2020**

***All assignments will be made available on July 6th.**

We hope everyone has a safe and relaxing summer. See you in September!

Sincerely,

THS Math Department:

Lauren Dane

Alessia Laise

Valerie Froehlich

Colleen Joyce
