Select One Summer Program

Music Jazz Section

Visual Arts Section

Astronomy Section

A Summer of Music, Art and Astronomy

If you can play an instrument and read music, or have talent in painting, or interested in learning about the stars and the planets consider swinging into College Now's Music, Art and Astronomy Program at York College.

Students may enroll in one of the following sections of paired courses: (1) music jazz or (2) fine arts or (3) astronomy. At the end of the summer, students from all three sections will come together at a ceremony to present final projects.

July 8 – August 15, 2019

Monday to Thursday, (plus a weekend performance in early August for the jazz section)

9:00 AM – 3:00 PM

Five (5) or Six (6) college credits upon successful completion

Music Jazz Section

MUS 253: History of Jazz (3 college credits | M – TH, 9:00 AM to 11:30 PM)

This college-level course offers a survey of the history of jazz from its origins to the present with a focus on major styles: ragtime, Dixieland, swing, bebop, Latin jazz, third stream, free, fusion, and today.

MUS 139: Jazz Workshop I (1 college credit | M – TH, 12:00 PM to 3:00 PM)

This college-level performance workshop focuses on contemporary jazz-rock compositions through the study of ensemble and solo techniques. Students employ jazz improvisation principles and will be coached in jazz performance practices and etiquette.

Visual Arts Section

FA 104: Introduction to Fine Arts (3 college credits | M – TH, 9:00 AM to 11:30 PM)

Introduction to form in the visual environment and the theories concerning its creation; development of understanding of the creative processes, past and present; introduction to art criticism.

FA 284: Computer Graphics (3 college credits | M – TH, 12:00 PM to 3:00 PM)

A hands-on introduction to the systems and resources of the Macintosh computer. Investigation of the image-making and text-handling capabilities of generic software, including Adobe Illustrator, Photoshop, and Painter. Development of original imagery from direct invention, digitized pictorial sources and selected type fonts. Final projects incorporate all course material and provide a basic experience of the computer as a comprehensive design instrument.

Astronomy Section

ASTR101: Introductory Astronomy: The Sun and Planets (3 college credits | M – TH, 9:00 AM to 11:30 PM) This course is an introductory level overview of the structure and properties of the Solar System, Sun, planets and their moons, comets, asteroids, meteors and more. The general principles of planetary motion and evolution will also be covered such as the appearance and motion of the Sun, sky, Moon and planets, gravity, the nature of light, magnetism and earthquakes. The properties of other newly discovered solar systems, the formation, evolution and fate of solar systems and the conditions for life here and elsewhere will also be discussed.

ASTR140: Introductory Astronomy (3 college credits | M – TH, 12:00 PM to 3:00 PM) This laboratory course introduces the fundamentals of astronomy such as: identifying constellations; the apparent motion of the sky, Sun, Moon and planets; the nature of light; gravity; the properties and life cycles of stars; and measuring astronomical distances.

Eligibility: To enroll in the Music, Art or Astronomy Programs,

All Students must

- be a New York City public high school student, entering as a senior in September 2015
- have a minimum score of 75 on the English Regents (ELA) or 500 on the SAT Verbal/Critical Reading section

In addition, Jazz students must

- play an instrument and read music (*auditions to be held in the York College Performing Arts Center, room 106*) *Dates to be announced in May.*
