

Parents,

Summer assignments are given to review, enhance, or accelerate your child's learning. The assignments assigned are based on individual levels and/or grade level standards. Please understand that we have chosen to use electronic platforms, therefore content exposure may be slightly different from what they were exposed to do during the school year. The Khan Academy tasks may seem overwhelming, but students can move through the modules. If tasks become difficulty, please watch the learning video, google the task, or skip it; but do NOT give up. Again our purpose is to review, enhance, or accelerate learning.

MyOn

Each student was given a MyOn login at the beginning of the school year. Students will need to login into their account and complete their individualized reading assignments. The reading assignment will be counted as a grade in the fall semester.

Reading Assignment

Students will read the books and complete the tasks that are in their reading accounts. Students are also encouraged to read from the summer reading lists that have been placed on DATE's websites.

Khan Academy

Rising 2nd-5th graders, should have their login from the school year. If you do not know your child's login or if you have a rising first grader, please create an account for your child. Directions are giving on the Khan Academy site. Once students are in the system they are to complete modules.

Rising First Grade

Complete the Kindergarten Module

This module is located under the "Subject" heading and then the "Math by Grade" tab . The system will spiral the student through the entire module. There are 53 tasks in this module.

Rising Second Grade

Complete the **First Grade Module**

This module is located under the "Subject" heading and then the "Math by Grade" tab . The system will spiral the student through the entire module. There are 60 tasks in this module.

Rising Third Grade

Complete the **Addition & Subtraction Lessons of the Arithmetic Module**

This module is located under the "Subject" heading and then the "Math by Subject" tab . Under the "Math by Subject" tab click on "Arithmetic" and then the "Addition and Subtraction" heading. The system will spiral the student through the entire module. There are 42 tasks in this module.

Rising Fourth Grade

Complete the **Addition & Subtraction and Multiplication & Division of the Arithmetic Module**

These modules are located under the "Subject" heading and then the "Math by Subject" tab . Under the "Math by Subject" tab click on "Arithmetic" and then the "Addition and Subtraction" heading. Once "Addition and Subtraction" are completed they can continue onto "Multiplication & Division." The system will spiral the

student through the entire module. There are 104 tasks in both modules. The “Multiplication & Division” module will be a challenge, but the exposure will help to prepare them for fourth grade content.

Rising Fifth Grade

Complete the **Addition & Subtraction, Multiplication & Division, and Fractions Module**

These modules are located under the “Subject” heading and then the “Math by Subject” tab .

Under the “Math by Subject” tab click on “Arithmetic” and then the “Addition and Subtraction” heading. Once “Addition and Subtraction” are completed they can continue onto “Multiplication & Division” and then “Fractions.” The system will spiral the student through the entire module. There are 210 tasks in all modules. The “Fractions” module will be a challenge, but the exposure will help to prepare them for fifth grade content and the passing of Milestones.
