Dear Parents and Neighbors of PS 94:

The New York City School Construction Authority (SCA) wishes to advise you that a construction project will begin on the building's Exterior Masonry, and Windows. The project will also include Flood Elimination.

Construction will begin shortly.

The work requires asbestos abatement. The workers who are in actual contact with the asbestos will be wearing protective suits and respirators.

A licensed asbestos abatement contractor performs the asbestos removal work, when the school is unoccupied. An environmental consulting firm manages the abatement work. This work is done under a Department of Environmental Protection permit. Representatives of the environmental consulting firm will be on site for the duration of the project to insure that the contractor adheres to all the proper regulations. The consultant will also monitor the air in the immediate area to insure that the removal is taking place properly.

It is expected that the entire project will be completed in February, 2020.

During the school year, regular project work will start after school hours and run until the time permitted by the Department of Building's issued After Hours Variance Permit.

Thank you for your cooperation during this important work on the building.

If you have any questions or need further information, please call me at (718) 472-8199.

Sincerely,

A handwritten signature in black ink that reads "Yvette Knight". The signature is written in a cursive style.

Yvette Knight
