The Schindler's List theme is different from the Harry Potter Hedwig's theme, but they also have some things in common. Both themes start off slowly. The feeling that Schindler's theme has is sadness and death. The feeling that the Hedwig's theme gives at the start is calmness and it's building up to something big. They both start off slow but give different feelings. They both start building up and both sound very beautiful, but both of them have a different type of beauty to it. The Schindler's List theme gives a heartbreaking beauty to it and the Hedwig's theme gives a happy beauty to it. The themes start getting faster and the emotions start getting stronger. The Schindler's theme represents the story it tells with the deep emotions of sadness and the heartbreaking feeling you get while listening. Hedwig's theme represents the story because it gives a calm and happy feeling to it and both are very beautiful. The Schindler's list melody gives the most perfect emotion for the Holocaust because it gives sadness and the feeling of death.
