

Why I love my cool new shoes

BY JUSTIN BISHOP
Kidsday Reporter

I think my Nike TN Air Max shoes are nice. The shoes come in different colors, which make them cool, so kids buy them.

I got mine at Foot Locker as a Christmas gift. My grandpa and grandma bought the shoes for me. Every time I buy shoes and my big sister is there, we usually buy the same ones.

The reason I wanted my new shoes was that the color looks nice. I wanted to get them in orange because it looks like there are flames on the shoe. Another reason was

ROBERT BISHOP

that there is a YouTuber called Funny Mike and his cousin Woo Woo who have the same exact shoes and in the same color. So, that's why I love the shoes. Sometimes I won't wear my new shoes because there is white on them, and it is easy to get them dirty.

My new Nike sneakers cost about \$160, but I think they're worth it because a lot of famous people have them

and the design of the shoes looks nice.

The only thing I don't like about them is that the color of the bottom is red.

Our class trip to a Vermont farm

BY FRANK HERNANDEZ
Kidsday Reporter

Two grades from our school were able to travel to Spring Brook Farms in Vermont to get the experience of a lifetime. We stayed on a farm for a week.

My grade got on a fancy bus, and we traveled for about six hours. Once we settled into our dorm, we were separated into three groups. We took a tour of the farm and saw cows, calves, pigs and turkeys.

The next day, we got into our groups and we started to do chores. My group went with our leader, Sarah, to the garden.

To get to the garden, we had to go on the Meditation Trail. It's a path where we had to stay quiet, and enjoy the nature and silence. We got to the garden and we collected vegetables.

We ate lunch and then split into new groups, which had to

clean up for breakfast, lunch or dinner. The next few days, we went to see where they make cheese, milk and clean up after the cows and feed calves.

Some of the other things we did were take a nature walk, herd chickens and walk the cows. I had fun herding the chickens inside their coop.

Another time, my group

decided to roll down a hill for fun. On the second-to-last day, we climbed a mini-mountain, and we could see everything.

I liked the farm a lot. My classmates and I talk about the trip all the time. We are excited to do the trip in eighth grade, when they teach us survival skills. This program is also known as Farms for City Kids.
