

Spring 2019

Dear Parents,

Welcome to Valley Road School. Kindergarten is a new adventure, the beginning of an exciting journey for children, filled with opportunities to learn about themselves and the world around them. The kindergarten curriculum provides the basic foundation for children's education.

The kindergarten program is designed to make the transition from home to school as smooth as possible, and to make each child's experiences with school successful and happy. Program goals include development of positive self-concept. Kindergarten children work and create independently, and learn to cooperate with others in a group. The kindergarten program is comprehensive in that it addresses the whole child, providing opportunities for social and emotional growth, as well as physical and educational development.

Our wish for the boys and girls who enter the doors of our school is that each individual child has the chance to grow personally, academically, and socially into lifelong learners who gain an appreciation of learning.

Sincerely,

Joseph Beltramba
Principal

Mallory Applebaum
Assistant Principal
