

MARCH

News

We made it past 100 days of school! Only a few more months to go before our second graders move up to the upper grades! We can hardly believe it. We have loved watching them grow as mathematicians, writers and readers. We can't wait to see what else they achieve!

Reading

In Reading Workshop this month, second graders will be reading informational, non-fiction books about topics of their choosing. Students will be placed in book clubs, allowing them to learn more about their topics from their peers. Students in book clubs may or may not be reading the same book, however each person in the book club will be learning about the same topic. During this unit, students will grow ideas and knowledge, helping them to be more comfortable in conversations with one another!

Writing

During Writing Workshop this month, second graders will become versed in the Scientific Method through the unit *Lab Reports and Science Books*. Students will take a deep dive into the wonderful world of science where they will do experiments and write them up in groups, pairs or as individuals!

Math

Second graders will continue expanding their knowledge of place value in Topics 9 and 10, where students will be learning how to add and subtract within 1,000. In both of these topics, students will be using similar strategies they have already learned but they will be working with three digit numbers.

Upcoming Events

March 5: Parent Teacher Conferences (Afternoon and Evening Sessions)
