Second Grade July Math Calendar!

1	1	1	1	1
Measure the perimeter of your kitchen table. Draw the table & write the answer.	Would you rather have 1/2 of a pot of gold or 1/8 of a pot of gold? Why?	Find a cylinder and a sphere in your house. Illustrate and label them.	Estimate how many steps you would take from your bed to the stove. Count them.	65 + 13= 37 + 28= 176 + 224= 94 - 87= 565 - 245=
How much money is shown?	Draw a clock that shows 2:15 & another clock that shows 3 hours after that time.	Make a bar graph that shows the different colors of the shoes in your house. Don't forget to label!	Draw a picture of a pizza divided into fourths, another into sixths and another into eighths.	Find the capacity of 5 containers in your house. Ex. Milk carton: 1 quart
Ben has 15 pencils. He needs 32 pencils in all. How many more pencils does he need?	Make a bar graph to show the favorite animals of people in your family.	Find 5 examples of parallel lines. Draw or name the objects.	Draw a digital and an analog clock to show the time that you woke up this morning.	How much money?

Second Grade August Math Calendar!

Grade: 2

Find and draw 3 objects that show symmetry.	Find an object that is a quadrilateral and illustrate it. <u>Bonus:</u> Find the area!	Four 2nd grade teachers need 25 math books. How many books are needed in all?	243 + 474= 184 + 253= 863 - 546= 957 - 284= 853 - 738=	When you add an even number to an odd number, will the sum be even or odd? Give 3 examples.
You pay for 10 tickets for Great Adventure Park for $30 each. How much do they cost?	A sandcastle is two feet tall. How many inches is this? Show your work.	Draw a Venn diagram that compares & contrasts summer and fall.	Is it more likely that children will be at the beach or at school today? Why?	How many different number sentences can you make that have a total of 12? (Hint: you can add, subtract, multiply or divide.)
Mrs. Martin buys 2 pens for each of her 17 students. How many does she buy in all?	What is the value of the 4 in the number 3,436?	Samuel woke up at 6:00 a.m. and came to school at 8:30 a.m. How much time has passed?	Raul ran 143 yards. Lisa ran 170 yards. How many more yards did Lisa run that Raul? <u>Bonus:</u> How many more feet did Lisa run?	If the Yankees score 7 runs tonight, 10 on Sunday & 12 on Monday, how many runs would they have scored in total?
