

# Earth, Moon & Sun

**Come and enjoy a special FREE showing at the Ball State Planetarium of their new educational show Earth, Moon and Sun!**

**This planetarium show explores the relationship between Earth, Moon and Sun with the help of Coyote, an amusing character adapted from Native American oral traditions. Coyote has many misconceptions about our home planet and its most familiar neighbors. His confusion about the universe makes viewers think about how Earth, Moon and Sun work together as a system and learn to distinguish between myths and science.**

**Learn the basics of fusion and solar energy and why the Sun rises and sets. Examine the Moon's orbit, craters, phases and eclipses. You'll even take a look at past and future space travel to our Moon ... and beyond!**

**What: This special planetarium showing is open only to families of Yorktown Elementary School and Pleasant View Elementary School in conjunction with the Tiger PAWS PTO. You must preregister in order to attend.**

**When: September 20, 2018 • 6 - 7p.m.**

**How: To reserve your seat please sign up via Sign Up Genius link**

**<https://www.signupgenius.com/go/60b0d4fa8ab23a5f94-planetarium> or the link can be found on our Facebook page "Tiger PAWS PTO"**

**Seats are first come first serve and limited. The planetarium cannot seat more than 140 guests for this special show so reserve your seat today!**
