

# Discover Drones: An Interactive STEM Camp

Drones capture stunning aerial photography, save lives in modern day search and rescue missions, collect snot samples from whales for scientific research, inspect vast agricultural landscapes, survey crocodile-infested waters, thrill spectators in FPV racing, bring medical supplies to war-torn areas and deliver pizzas in New Zealand. The world has fallen in love with them, and we're sure your child will too.

In *Discover Drones*, your child will experience first-hand the technology that's been sweeping over the world. Students begin by building RubiQ, their training drone for the camp! After learning the safety regulations and procedures surrounding drones, they'll learn the basics of flight through a training simulator before moving to actually piloting the drone!

WHEN: June 4-8 2018 OR June 18-22 2018 8:00am-12:00pm

WHERE: Yorktown Elementary School

WHO: Any students who just completed grades 3-5

COST: \$125

NOTE: There must be a minimum of 5 campers. Camp will max out at 20 campers and will be first come, first served.

For questions, please contact  
Mrs. Boone
